Prof Micky Matee, MUHAS (Experiences as a Tanzanian scientist: challenges & opportunities)

Prof Matthias Frosch, Wurzburg (MDRA surveillance)

Prof Jean Nachege , Stellenbosch (HIV in South Africa: perspective)

Prof Wolfgang Preiser, Stellenbosch(TB in South Africa: perspective)

The event took place and was attended by well over 400 participants (local and international). Students showed a great participation with over 200 of them registered for the two-day event.

An abstract book has been provided to all participants and will soon be available online.

Various sponsors made the event possible with an approximate total of funds amounting to 40 million Tanzanian Shillings.

We had a very positive feedback from several of our participants and we are already looking forward to our next yearly event! Please have a look at our photo gallery!

Asante sana to all who made this event possible!

Karibuni sana in 2018!
